

# Facts you should know about IT VIRTUAL ADMINISTRATION SERVICES

## What is an IT Virtual Admin?

IT Virtual Admins (IVAs) or Remote Administrators provide managed technology services from anywhere in the world

With Virtual Administration, businesses have access to the right talent for their organization

Virtual Admins can be full-time or part-time

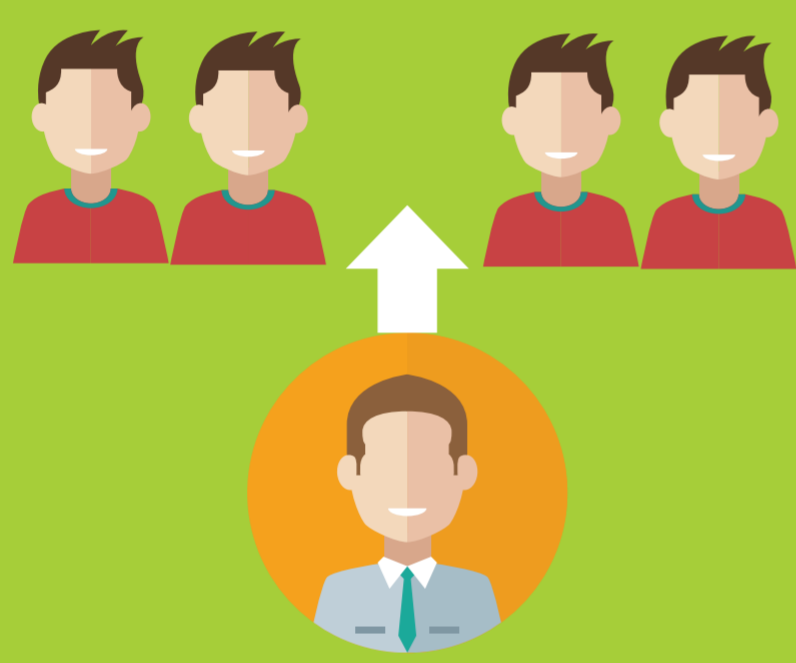

Focus on performance and productivity

A focus on performance, rather than a timesheet, means that companies can expect to see better outcomes

## The Benefits of Virtual Administration

Fill resource gaps or augment existing teams

Simpler on-boarding

Lower costs and time savings on recruiting, onboarding, training and benefits

### DID YOU KNOW

It is estimated that Virtual Admins can reduce the cost of IT administration for your company by 25% to 50%

## How Do I Get an IT Virtual Admin?

IT Virtual Administrations can be found a number of ways. The easiest way to find an IVA is through a credible technology partner.

- 1 The provider will meet with you to discuss needs
- 2 They will present a proposal with a recommended service model
- 3 Upon execution of the agreements, services can begin immediately

As results-oriented workplace environments become more and more popular, and good IT talent remains scarce especially in certain geographies, organizations will continue to entertain and utilize Virtual/ Remote working arrangements.
